

Damage potential of *Drosophila suzukii* and development of phytosanitary measures (DROSKII)

Funding

Mixed non-competitive-virtual pot funding mechanism. Each funder only pays for the participation of their own national researchers.
Total funding € 296,143

Research consortium

CRA-ABP-IT, JKI-DE, UK-FERA, AGES-AT, ACW-CH, FondMach-IT

Contact information

Project coordinator: Sauro Simoni
sauro.simoni@entecra.it

Goals

To help growers in Europe with the development of control measures for *D. suzukii*

Objectives

To characterise and identify:

- the potential dispersal of *D. suzukii* in Europe
- the most behaviourally-active volatiles emitted by to fruit hosts (for development of selective attractant lures)
- the applicability and efficacy of environmentally sound control methods (e.g. physical barriers, mating disruption)
- the occurrence and level of incidence of natural enemies

Key outputs and results

Project just finished, final report not yet available
